Energy Star

A Touchstone Energy® Cooperative 

ENERGY STAR is a government-backed symbol for energy efficiency. The mark identifies new homes and more than 50 types of products that are energy efficient and offer the features, quality and performance that today's consumers expect. Products that can earn the ENERGY Star include appliances, lighting, home office equipment, consumer electronics and heating and cooling equipment.

A home that earns the ENERGY STAR is significantly more efficient than a standard home. By purchasing an ENERGY STAR qualified home, you can have all the features you desire in your home, plus lower utility bills—all the while helping to prevent greenhouse gas emissions.

ENERGY STAR is a voluntary partnership between the government and more than 8,000 organizations, including 3,500 of the nation's home builders. Together with home buyers and their families, we are working to achieve a common goal - protecting the environment for future generations by changing to more energy-efficient practices today.

It's our future. Together, we can make a change for the better. In 2005, Americans, with the help of ENERGY STAR, saved about \$12 billion on their utility bills and reduced greenhouse gas emissions equivalent to those from 23 million vehicles.
