

A power surge is an abrupt increase in power that can cause serious damage to any device that uses electricity. Many different things can cause power surges, but lightning is the most common culprit.

Our surge protector is a meter-based unit, which we install behind your meter. It is designed to protect motor-driven appliances such as your washer and dryer, air conditioner, etc. The leased unit is \$6.95 per month with a one-time \$25 evaluation fee.

For items with sensitive electronics such as your computer and television, you need additional protection at the point of use. We offer quality point-of-use, or plug-in protectors, at affordable prices.

We offer the following POUs:

- CSS 1- protects microwaves, garage door openers or any 120-volt electronics.

\$12

- CSS 1T- protects from harmful surges, spikes and line noise. Perfect for telephone, fax machines, modems or laptops.

\$16

- US1206- protect all your sensitive electronics with six swiveling outlets, twin coaxial and telephone modules.

\$69

- MPM8HT- protects anything from entertainment centers to computers. It has triple coaxial protection as well as phone line protection and modules to protect cable TV, satellite and cable modems

\$69

** Other POUs may be available.
